

# Development in Housing Opportunity Areas Local Planning Policy

## **Responsible directorate:** Planning and Community Development

### **Objectives:**

- To provide a planning framework to support a high standard of urban design and residential amenity in a high-quality public realm setting.
- To facilitate compact sustainable urban form around centres and train stations through pedestrian-oriented development, safe pedestrian spaces and adequate parking facilities.
- To ensure that the Housing Opportunity Areas provide for both the needs of the existing community and the future population of the area.
- To ensure that new development enhances and respects the desired character of the locality and provides a neighbourhood within which the residents can identify.
- To concentrate development in localities with adequate infrastructure that is accessible to transport and centres.
- To protect and enhance the amenity of residents through attractive streetscapes and increased greening of verges and private land.
- To encourage variety and diversity of housing choices that meets the future housing needs of the City.
- To allow development that is of a scale and nature that provides an appropriate transition to adjoining land uses.

### **1. Authority:**

This policy has been prepared in accordance with Clause 4, Schedule 2, Part 2 of the *Planning and Development (Local Planning Schemes) Regulations 2015* (Regulations) which allows the local government to prepare local planning policies relating to planning and development within the Scheme area.

## 2. Application:

This Policy shall apply to all residential development within a Housing Opportunity Area within the City of Joondalup which is being developed at the higher applicable density code as identified under the City's *Local Planning Scheme No. 3*. It does not apply to residential development located outside a Housing Opportunity Area or being developed at the lower applicable density code.

This Policy is to be read in conjunction with *Local Planning Scheme No. 3* and any other relevant policy. Where this Policy does not contain specific provisions on development matters that are otherwise contained in *State Planning Policy 7.3: Residential Design Codes (SPP7.3)*, or any approved Activity Centre Plan, Local Structure Plan or Local Development Plan, then that documents controls shall prevail in that instance only.

## 3. Definitions:

**"landscape area"** means land developed with garden beds, shrubs and trees, or by the planting of lawns. Landscape area does not include rockeries, ornamental ponds, swimming pools, driveways, uncovered car parking, bin areas, alfresco areas or other areas finished with a non-permeable surface.

**"permeable surface / permeable pavement"** means soil or ground surface treatments that allow rainwater and stormwater to infiltrate to the underlying subsoil. Surfaces that do not meet these requirements are considered to be non-permeable.

**"walkable catchment"** means that actual area served within a walking distance along existing pedestrian infrastructure routes. Walkable catchments are to be determined using the technique outlined in *Liveable Neighbourhoods* with distances measured from the station platform (for train stations) and the lot boundary of the core or the largest commercial land holding within an activity centre.

## 4. Statement:

This Policy provides the assessment criteria for applicable residential development within a Housing Opportunity Area in the City of Joondalup and has been prepared in accordance with the Regulations and Clause 7.3 of SPP7.3, Volume 1 and Clause 1.2 of SPP7.3, Volume 2 — Apartments.

### Character of Housing Opportunity Areas

Housing Opportunity Areas are neighbourhoods that provide a mix of single houses, grouped dwellings, low-rise apartments and ancillary accommodation.

Housing Opportunity Areas include streetscapes that have a landscaped character and a prevailing built form of up to two storeys.

More intense development should be located along distributor roads in close proximity to key nodes and services such as higher order activity centres and train stations.

Redevelopment of the Housing Opportunity Areas is occurring at densities greater than that of existing housing and as a result, the scale of new development may be greater than existing housing.

The Housing Opportunity Areas are in the early stages of transition and there is a need to

moderate the scale of development to provide a considered change from present character to future character to ensure a suitable level of amenity is provided for residents and neighbours now and into the future.

## 5. Details:

This Policy is to be read in conjunction with either SPP7.3, Volume 1 for 'Single House' or 'Grouped Dwelling' development, or SPP7.3, Volume 2 for 'Multiple Dwelling' development.

Table 1 Development Standards of this Policy is divided into four columns with headings and associated objectives for each clause under SPP7.3. The four columns outline the following:

- The 'Sub-section' column of Table 1 includes the relevant design element and the objectives specific to the relevant development standard.
- The 'Form of Development' column of Table 1 specifies what land use/development the relevant provisions/objectives applies to e.g. 'Single House', 'Grouped Dwelling' and/or 'Multiple Dwelling'.
- The 'Development Standard' column of Table 1 includes the amended and/or replacement 'acceptable outcome' or 'deemed-to-comply' provision of that specific clause of SPP7.3 stated in the 'Reference to State Planning Policy 7.3' column.
- The 'Reference to State Planning Policy 7.3' column of Table 1 identifies which clause of SPP7.3 is either being amended, augmented, or replaced by this Policy.

Residential development will be assessed against the applicable 'Development Standards' and the associated Objectives of that section/clause. This is in addition to any other applicable 'acceptable outcome' or 'deemed-to-comply' provision and/or 'element objective' or 'design principle' of SPP7.3.

If a development site adjoins a site which is subject to a dual density code and that site is yet to be developed to the higher code, then the base density code applies for the purpose of the application of any relevant development standards that require consideration of the adjoining site.
